Average Term to Maturity (years)	3.7	3.4

Notes:

- All key financial indicators exclude the effect of FRS 116 Leases.
- In accordance with the Property Funds Appendix, the aggregate leverage is calculated based on the proportionate share of total borrowings over deposited properties. Due to a temporary draw down of MML to fund the 2H 2022 distribution due to some timing lag from the repatriation from China. Excluding this draw down, the gearing would have been 39.1%.
- Ratio of the consolidated interest expense for the respective financial year reflected over weighted average borrowings on balance sheet for that financial year.
- Ratio is calculated by dividing the trailing 12 months EBITDA over the trailing 12 months interest expense (exclude finance lease interest expenses under FRS 116) in accordance with MAS guidelines.
- The adjusted interest coverage includes the trailing 12 months perpetual securities distributions.
- CLCT's interest rate hedging policy is to hedge at least 60% of total debt (exclude RMB denominated and MML loans) into fixed interest rates.
- Impact on the interest expense is based on floating rate loans (inclusive of MML)
- Based on 1,675 million units and on unhedged borrowings as at 31 March 2023.
- Based on FY 2022 DPU of 7.50 S cents.

Business Outlook

- Retail sales in China rose by 18.4% in April 2023, year-on-year, up from the 10.6% increase in March¹.
- China 1Q 2023 GDP beat expectations, led mainly by consumption and services sectors on frontloading of reopening impulse and policy support².
- PBOC at its 1Q monetary policy committee meeting on 7 April re-emphasised its pro-growth stance and continued support for the economy³.

Retail

- ✓ At the recent Two Sessions, the Chinese Government placed recovery and expansion of consumption as a priority and pledged to encourage spending⁴
- ✓ Well-positioned to ride recovery of domestic consumption with completed AEs across multiple assets

Business Park

- ✓ Poised to benefit from structural upgrading of economy towards technology development, and innovation-driven growth
- ✓ Portfolio's top tenant sectors – Electronics and Engineering are aligned with China's policy priorities and strategic policy directions

Logistics Park

- ✓ Domestic activity to drive a rebound in the reopening, and more policy loosening is expected to support recovery momentum. However, growth might be hampered by subdued global demand⁴

Proactive Business Park Leasing Strategies

Amidst New Supply, to Focus on Building Tenant Community and Expanding Existing Tenant Network

Further **diversifying** tenant sector in **business park portfolio**

- Smaller e-commerce enterprises impacted during COVID-19 disruptions, with business confidence weakening
- Seeking to capture demand from more resilient sectors like Biomedical Sciences, Engineering and Electronics to gradually ramp up occupancy

Balancing between Occupancy, Tenant Quality and Rentals

- Continue balancing between occupancy and quality tenants with the gradual improvement in business sentiments

Focus on **securing renewals** and **expanding existing tenants** who have additional requirements, while continuing to source for **new pipeline**

- Collaborating with local government bodies, seeking to capture new space demand post COVID-19

Portfolio Valuation Increased 2.0% YoY

Timely Pivot to Diversify into Business Parks and Logistics Parks

+2.0% YoY

Portfolio Valuation
(RMB million)

Retail: RMB 18,059 million (-0.6% YoY)

- Cap rate assumptions remained stable with China's continued urbanisation to drive long-term development
- Most market rents and long-term rental growth prospects have moderated due to the pandemic, leading to the slight decline in the retail portfolio valuation

Business Park: RMB 5,478 million (+12.3% YoY)

- Cap rates of well-managed business park properties have compressed due to:
 - ✓ Demand for new economy assets and C-REITs providing valuation benchmark
- Consistent positive rental reversions across the quarters led to an increase in value YoY for CLCT business parks

Logistics Park: RMB 1,704 million (+0.6% YoY)

- Demand remained strong as investors seek out alternatives to commercial assets to capture long-term demand drivers such as third-party logistics and e-commerce growth
- Cap rates remained stable in 2022 with CLCT logistics parks registering stable value YoY
